SALE DAY

INTERNET VIEWING & BIDDING

If you are unable to join us on sale day, the auction will broadcast on Superior Livestock in 2 places. To view the sale broadcast live go to:
www.superiorlivestock.com or
www.superiorclicktobid.com. We recommend you pre-register.

take the LEAD WITH LAZY JB ANGUS

SUNDAY, MARCH 12, 2017 | 1:30 PM MST | MONTROSE, CO

SALE TERMS AND CONDITIONS All bulls sell fully guaranteed under Suggested Sale Terms and conditions of the American Angus Association. Terms are CASH. All bulls are to be paid for during or immediately after the sale and will not be released until settlement has been made. Cattle will not be transferred until paid for in full.

HERD HEALTH All bulls are on a complete health program. All bulls have been vaccinated for 7-Way, Blackleg, BVD, Haemophilus and BRVS. Bulls were recently poured with Ivomec. All bulls have been tested negative for trich and PI BVD.

FERTILITY AND SOUNDNESS All bulls have been semen tested and certified as satisfactory breeders. Scrotal measurements will be available sale day.

PAP SCORES All cattle have been PAP tested by Dr. Tim Holt. These bulls were born, raised and developed at high altitude. They spent the summer at 7,500 to 9,000 feet. Lazy JB Angus has been PAP testing for over 25 years.

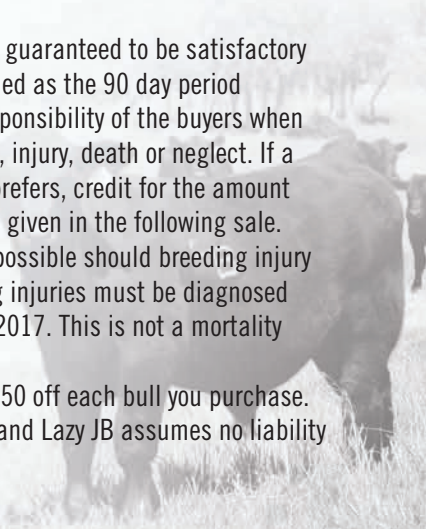

INSPECTION OF BULLS & HEIFERS Cattle may be inspected at any time prior to the Sale.

INSURANCE Insurance will be available sale day. Please notify sale clerk if you wish to purchase insurance.

FIRST BREEDING SEASON All bulls selling for \$3,500 or more are guaranteed to be satisfactory breeders for the first breeding season. A breeding season is defined as the 90 day period following the first turnout of the bull. All animals become the responsibility of the buyers when the animal leaves the ring. This guarantee does not cover illness, injury, death or neglect. If a replacement bull is available he will be provided or if the buyer prefers, credit for the amount of purchase minus \$1,500 will be applied toward one bull will be given in the following sale. Buyer keeps the salvage value. Please notify Lazy JB as soon as possible should breeding injury occur prior to the injured bull being sold for salvage. All breeding injuries must be diagnosed by a veterinarian and all claims must be made by September 1, 2017. This is not a mortality insurance policy nor does it cover mismanagement or neglect.

TRUCKING DISCOUNT Bring your trailer on sale day and receive \$50 off each bull you purchase.

LIABILITY All persons attending the sale do so at their own risk, and Lazy JB assumes no liability for accidents, etc.

Thank you

DEAR FRIENDS & CATTLEMEN,

Thank you for taking the time to look at our 2017 Annual Bull Sale offering. Despite the downward trend in cattle prices over the past year, there is a sense of excitement that filled the air in the past couple of weeks. We believe that not only are we in the process of “Making America Great Again”, we are in the midst of making the “Cattle Industry Great Again”. Our offering this year is the direct result of a successful program that has been over 5 decades in the making.

The “no frills” environment that our cattle live in has sorted our cattle, not EPDS. The dams of the bulls offered in this sale live on grass 8 months out of the year, and during the remaining months they are fed grass hay on open pastures. This environment includes grazing on rugged mountain pastures at elevations that range from 7,500 to 9,000 feet. As always the bulls in this year’s sale will thrive at any elevation. They are born on pastures at 6,500 feet, grazed through the summer and part of the fall in the mountains and are then developed north of Montrose at 5,800 feet. Unquestionably, the bulls have performed well under the stress of altitude.

Each year we strive to make your bull buying experience better and simpler. To assist you with your selections, we are once again providing you with these additional tools: genomic enhanced EPDS as well as PAP scores. We are especially excited to have Superior Productions hosting this year’s sale. We have made preparation to bid and buy through Superior Productions’ “Call or Click-To-Bid” service. You can also view all the lots on our website, www.lazyjbangus.com or at www.superiorlivestock.com.

Please join us on Saturday, March 12th to make your next step in “Making The Cattle Industry Great Again”! We invite you to stop in before the sale to see these bulls or give us a call if you have any questions.

Jeff, Kathi, Brandon & Britney - Richard & Elaine

17270 6450 Rd., Montrose, CO 81403
kathi@lazyjb.com | www.lazyjbangus.com

OUR SINCERE APPRECIATION TO THE FOLLOWING

- › Dr. Tim Holt, Fort Collins, CO for PAP testing our cattle
- › Dr. David Kuntz for fertility, trich and BVD testing
- › Western Slope Animal Hospital for providing us with our general herd health needs
- › Wesley Brown for ultrasounding our cattle
- › Simmons Mountain Ranch for leasing us summer pasture
- › The Stockyards 4-H Club for assisting us with lunch and clean up
- › Friends and family for helping us on sale day

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding platform for cattle buying. Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy - just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. There are 2 places to view the sale broadcast live on the internet: www.superiorlivestock.com or www.superiorclicktobid.com. Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to www.superiorlivestock.com, but if you want to bid over the computer you must go to www.superiorclicktobid.com. Remember you can call in to bid on the internet, but you must be a member of www.superiorclicktobid.com to "clickto-bid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

***If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at www.superiorlivestock.com prior to bidding.**

This well made, sound Tiger son is long and agile on the move and sure to produce calves that bring in a paycheck. \$F in top 20% with a WW ratio of 102.

UNDERSTANDING BIRTH EPDS

There's not a single person out there who wants to spend every waking minute with their cows and assisting with births. And in a search to reduce the labor and death loss of calving some producers have been selecting primarily for low-birth-weight-EPD bulls. What we've noticed is that the birth EPD is NOT fully understood. So let's take a look at what these numbers actually mean.....

An EPD is a prediction of the average progeny performance, not a guarantee. To demonstrate how birth weight EPDs work, consider the following two bulls in Example 1.

EXAMPLE: BIRTH WEIGHT EPD

EPD in pounds: Sire A +5.1 Sire B +1.2

The expected difference in the progeny of Sire A and Sire B for birth weight is 3.9 pounds. Sire A has an EPD of +5.1 and Sire B has an EPD of +1.2. On the average, it would be expected that the calves from Sire A would be 3.9 pounds heavier at birth than calves from Sire B. **This is assuming that all calves are man-aged uniformly and are from cows of similar genetic merit and age.**

How one selects their bulls will more than likely change when an understanding of "Birth EPDs" is developed. Rather than searching for the lowest birth EPD in the sale, we should compare the birth EPDs using the mathematical equation demonstrated above.

Before heading off to the next bull sale an evaluation of your cow herd, including birth weights, calving issues is important before selecting a bull, but don't forget to look at all the traits! Selection based on a single trait can cost you performance and money. We are in the beef business; there is no substitute for fertility, soundness and performance.

In the February 2012 edition of the Angus Beef Bulletin, American Angus Association Regional Manager, David Gazda, "At the risk of being controversial, many of these small calf scenarios could be eliminated if the producers would simply be willing to accept more birth weight, particularly when breeding mature cows. One only has to attend a production or test station sale to witness firsthand how the heavier-birth-weight-EPD bulls are penalized and therefore sell at a substantial discount. Have calving-ease and low-birth-weight EPDs been overemphasized to commercial producers? Maybe; maybe not."

PAP MEASUREMENTS

Over the years cattlemen have attempted to reduce the selection and the development of cattle to numbers on a piece of paper. In reality there are numerous factors that affect the production and performance of cattle. We believe that PAP scores are an important selection tool but are often misunderstood. The registered bull business is extremely competitive creating a "NUMBERS RACE". Every breeder has a different theory and philosophy regarding PAP scores. In all fairness to our customers who graze cattle at high altitude and those who do not we want to share with you the facts:

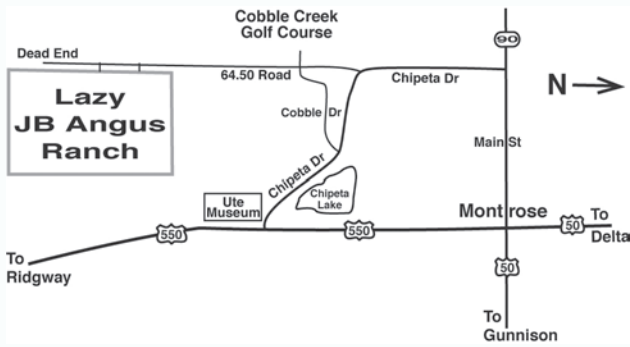

- Cattle at 6,000 or above feet are most at risk for "Brisket or High Altitude Disease".
- Cattle PAP tested at low elevations (less than 5000 feet) may have acceptably low scores at that time, but when re-tested at higher elevations the score may increase. To increase the repeatability of the PAP test cattle should be tested at 6,000 feet or higher and must be at that elevation for at least 3-6 weeks
 - 44 and below – low risk
 - 45 – 49 – moderate risk
 - 50 and above – high risk
- The PAP test can HELP determine which animals are most at risk for brisket disease or a possible genetic risk, detecting the early stages of the problem, and elevated PAP measurement.
- Interestingly, the problem sometimes appears in feedlot cattle, even at low elevations, as they get heavier and closer to finish weight. This entire situation is not fully understood at this time but may be related to growth, size and the body's demand for more oxygen, because the heart must work harder.

A special thanks to Dr. Tim Holt for continually providing us with information and assistance in understanding High Altitude Disease and PAP measurements. And congrats to him—2015 Zoetis Distinguished Teacher of the Year
